INTRODUCTION 2022

Human imagination makes it seem as though the future is always running late. At each moment, great minds are remodelling future technology and the world around us in big and small ways. We may not fully realise it because we've lived through it, but the rate of progress over the years has been staggering in every field. Here's looking at some of the revolutionary inventions that have changed the way we live.

Email (Ray Tomlinson)

Ray Tomlinson, an American computer scientist, sent the world's first email in year 1971. He revolutionised the field of communications, and fundamentally changed the way in which people and organizations interact.

Around the world in seconds. From one device to another, via everything in between.

Electric Cars (Robert Anderson)

English inventor Robert Anderson developed the first crude electric vehicle in 1832, but it wasn't until much later that electric cars became a practical mode of commuting.

The 'not so swift' journey of electric cars: Born 200 years ago, lost for decades, back now, & here to stay

A switch to the 'brighter' side of energy consumption

Solar Panel (Charles Fritts)

Rewinding to 1883 when New York inventor Charles Fritts created the first solar cell by coating selenium with a thin layer of gold. This solar cell became a major precursor to the technology used today.

Drone (Abraham Karem)

The genius and innovative mind behind the drone is Abraham E. Karem. He created his very first drone, Albatross, and eventually, the sophisticated Amber, which finally evolved into the famed Predator drone, and earned him the name, 'Drone daddy'.

When tech went where no human could to present a never-seen-before perspective of nature's brilliance.

Facial Recognition (Woodrow W Bledsoe)

A research team led by Woodrow W Bledsoe ran experiments between 1964 and 1966 to see whether 'programming computers' could recognize human faces. The team used a rudimentary scanner to map the person's hairline, eyes, and nose.

When your face became your password to unlock phones, interact on social media and secure homes

Internet (Vinton Cerf and Bob Kahn)

Computer scientists Vinton Cerf and Bob Kahn invented the Internet communication protocols we use today and the system we refer to as the 'Internet'.

From just technology, to a lifeline of survival; the momentous journey of the Internet

A technology of the future, that brought another world within sight

Virtual Reality (Morton Heilig)

Virtual reality technology was invented in 1957 by Morton Heilig whose multimedia device 'Sensorama', is considered one of the earliest VR systems. The term 'virtual reality' was coined much later in 1987 by researcher Jaron Lanier.

Wi-fi (Vic Hayes)

Vic Hayes, called the 'father of Wi-Fi', chaired the IEEE committee that created the 802.11 standards in 1997. Before the public had even heard of Wi-Fi, Hayes established these standards that would make Wi-Fi feasible.

The liberating web
